Climate

Hot climate: a place that is very warm most of the time.

Warm climate: a place that feels not too hot; perfect for wearing a t-shirt and shorts.

Mild climate: a place where the temperature is comfortable; not too hot and not too cold.

Cool climate: a place that feels a little chilly.

Cold climate: a place that is very chilly and a coat, gloves and hat are needed.

Our planet

The **North Pole** is located at the very top of the planet in the **Arctic**.

The **Equator** is a line drawn on maps to indicate the warmest part of the world across three continents.

The **South Pole** is located in the Southern most part of the planet in **Antarctica**.
