## Settlements

### Different types of settlement

A hamlet is a very small settlement, usually with only a few houses and no shops.

A village is a small community, larger than a hamlet, with more houses, a few shops or a pub (meeting point).

A town is a settlement that is bigger than a village, with more houses, schools, shops and other facilities.

A city is a large settlement with many people, buildings and services, usually with a cathedral or a university.

### Ordnance Survey Maps

An OS map is a drawn 'bird's eye' view of the local area. Human and physical features are shown as symbols. You can use a key to learn their meaning.

### Grid References

A grid reference will help locate areas or symbols on a map.

Vertical lines are **Northings**.
Horizontal lines are **Eastings**.

When reading a grid reference, you note the bottom left corner of the grid square.

Woodman's Wood is located at **0201**
